INVASION OF THE ZOMBIE MONSTERS

ENGLISH

THE GAME

Finally, Ned and Linda can enjoy a little time together. After an amazing day, during which their institute club obtained the Science Olympiad 1st award for the fourth time in a row, the happy couple can at last relax at the city cliff, looking at a fantastic star-filled night sky. But the happiness will not last as long as they expected...

Suddenly, a thunderbolt fell from the sky and hit Ned's car. When Ned managed to react, he saw a horrible image: a huge evil shadow had fallen over the city and kidnapped Linda. The evil being just hid itself into the city High, taking Ned's girlfriend with it, and creating chaos and darkness in the whole town! Ned, still stunned by the thunderbolt attack, thought it would be the end for everyone...

But when evil forces rise over the good ones, the moon casts a spell on the hero, the chosen one, the one destined to save us all. And the moon cast its power ray on Ned, who felt strange and full of power again! Now, with his new powers, he will start his quest to save his girl and finish off the bad one. Are you brave enough to face your destiny?

HOW TO PLAY

As Ned Friks, chairman of the Science Club at High Skull Institute, you must face the evil one and his army of zombie monsters in order to save Linda and all mankind from certain destruction. Your powers, gathered from the moon ray, enable you to shoot moonlight power balls with your finger: it being a holy energy, monsters are totally weak against it, so it will become your best weapon.

ENEMIES

You must destroy the zombie monsters army located in the woods and city: classic zombies, zombie werewolves, zombie reptiles, zombie plants... even zombie souls or bigger enemies, such as the Zombie Grave-keeper or the Big Final Demon. Each one has its own behaviors that you should memorize for you to detect their weak points. Kill every monster and send their souls again to the depths of the inferno where they belong!

ITEMS:

Some enemies, when killed, can drop coins. Get as many as you can; when you obtained 100 of them you'll get an extra life! Apart from coins, enemies can drop down power capsules. Those capsules are constantly turning: be sure to get them when they show the color that corresponds to the power you want to acquire.

GREEN *POWER UP*	Your moonlight energy power increases.
RED *POWER DOWN*	Your moonlight energy power decreases.
DEEP BLUE *NUCLEAR BLAST*	All enemies on screen are destroyed.
PURPLE *FULL DOWNGRADE*	Your moonlight energy power decreases to the minimum!
BLUE *TIME UP*	You'll get 20 extra seconds for your time counter.

When you complete each stage, your remaining seconds will be converted into coins: try to finish all stages as fast as you can in order to get more coins, so you can obtain extra lives easily!

CONTROLS

Push any key of your favorite control type at the title screen to activate it. To play using keyboard, use "Q", "A", "O", "P" and the spacebar. But if you prefer, just use your joystick. Press the "H" key to hold the game.
